

# Air Superiority News

Volume 1 Issue 1

vortron.com

September 2002

## Welcome to the first Vortron newsletter.

If you work with air blow-off systems, then the new Air Superiority News will have something for you.

This is just the starting point for Air Superiority News. We're keen to know what you want and how you want to be involved so we can build a really useful relationship with the air blow-off community.

## A snapshot of Vortron Industrial.

Vortech Engineering, LLC, is an advanced technology and manufacturing company serving customers worldwide with centrifugal/industrial drying, aeration, de-watering and blow-off systems, supercharging systems and components. The corporation, which is headquartered in Channel Islands, California, employs 70 people and has four major business units: Engineered Material Services, Automotive, Marine and Vortron Industrial.

Vortech occupies a 60,000 square foot facility that houses administration, engineering, manufacturing, testing, quality control, sales and marketing.

## FORCED-AIR CLEANING, DRYING, AND BLOW-OFF JUST GOT BETTER!

Vortron's **AIRPOWER™** line of compact centrifugal blowers promise to raise the bar for industrial blower performance. Flow and pressure not attainable with competitive single stage products are now easily achieved. Three models are available, the flagship Z40, the ultra efficient X40, and the scrappy J70. Each are specialists in their own right and are aerodynamically optimized for meeting specific flow and pressure requirements. All are clean-sheet designs developed from the ground up to deliver best performance, best durability, and best efficiency available anywhere today. With peak isentropic efficiencies reaching 79%, no other compact blower product even comes close.

### Vortron's Shows/Meetings

For a more extensive list of shows and meetings, refer to our WEB site at Vortron.com.

**September 13, 2002** – Arnel Compressor Company's one day Power Conservation Demonstration Seminar at 114 No. Sunset Ave., Industry, CA. For additional details contact Arnel Compressor at 626-968-3838.

**October 16-17, 2002** – Western Michigan Plant Engineering Show in Grand Rapids, MI at the Deltaplex.

## AirPower™ at CleanTech 2002

At our inaugural trade show we had a free hand to develop our booth layout. We selected a 10' x 20' corner booth. Our message was performance, efficiency, and cost savings based on our featured article in the Special Focus March issue of Clean Tech entitled "Don't Blow This One Off".

A unique attraction at our booth was our inflated Vortron Columns. A 3 HP AirPower Blower maintained the Air Columns around the clock during the 3 day event.

## Air Superiority Air Knife Systems

**AIRPOWER™** is developing a new line of air knives, components and accessories. We will be introducing each in coming issues of this newsletter. Our newly developed air flow dividers will be the first air knife system component introduced. Below you will find a preview of the 3 dividers: the "Y", the "TRI" and the "Quad".
